1. Introduction

Crypto720 is a community-first cryptocurrency project designed to educate, empower, and reward users through blockchain, gaming, AI, and real-world events. The project includes CryptoCoinDay, the only annual global crypto celebration, held every July 20 — a day for real connection, education, and innovation.

2. Our Mission & Vision

Mission: To build a crypto-powered ecosystem where every person, regardless of background, can learn, earn, and connect using blockchain and AI technologies.

Vision: A global community where crypto and artificial intelligence work together to serve humans, creating value, not just profits. Our goal is to connect people worldwide through education, fun, and shared experiences.

3. Tokenomics Overview

The total fixed supply of Crypto720 tokens is:

720,000,000,000,000 C720 (720 trillion tokens)

These tokens are distributed across multiple key areas for balanced utility, transparency, and impact.

4. Wallet Allocations

App Utilization – 24.44% – 175,968,000,000,000 C720

Business & Team Development – 11.11% – 79,992,000,000,000 C720

Charity – 2.22% – 15,984,000,000,000 C720

Public Sale – 6.67% – 48,024,000,000,000 C720

People Airdrop – 55.56% – 400,032,000,000,000 C720

Each wallet is independently managed and traceable on the blockchain.

5. Wallet & Transaction Security

Crypto720 prioritizes safety and trust:

- Dual login: email/password + biometric or passcode
- Additional confirmation for all token transfers

- Admin wallets are operated outside of the app for added control

This layered security ensures that users and their tokens are always protected.

6. CryptoCoinDay: The Global Celebration

Crypto720 is the only coin in the world with an official global celebration: CryptoCoinDay – Every July 20.

Hosted physically in Atlanta, Georgia (exact location announced up to 90 days prior) and globally at CryptoCoinDay.com, the event brings together:

- Crypto users, creators, and investors
- AI innovators and educators
- Real people asking real questions
- Panel talks, live games, workshops, networking
- Tickets purchasable with C720 tokens

7. Charity Structure

Crypto720 is committed to direct social impact.

Over 15 trillion tokens (2.22%) are set aside in a dedicated wallet to support:

- Registered nonprofits
- Education and digital inclusion
- Humanitarian relief
- Youth tech programs
- Tech accessibility projects

Rather than forcing donations, Crypto720 will grant tokens directly to these causes. The community can suggest, vote, and track all charity distributions transparently via the blockchain.

8. Crypto720 App & Wallet Use

Claim 50,000 Free C720 Tokens

Each user is eligible to receive 50,000 C720 tokens — a symbolic allocation tied to a global mission to reach 8 billion people. But this isn't just a giveaway — it's a commitment to community participation.

To unlock the airdrop, users must complete all of the following:

- Follow us on social media

- Refer 5 friends to join the app
- Download and activate the official Crypto720 wallet app
- Become a Crypto720 Member (\$19/year)

These steps ensure that tokens are delivered to real, active members of our global community — not bots or spam accounts.

Once inside the app, users can:

- Send and receive C720 tokens freely and securely
- Use C720 to buy tickets, play games, and purchase merchandise
- Earn extra tokens through monthly challenges and AI-powered learning tasks
- Track rewards, connect with others, and unlock special perks within the ecosystem

9. Games & Community Interaction

Crypto720 promotes real-time engagement through games that:

- Reward winners in real C720 tokens
- Allow community tournaments and multiplayer options
- Educate users on value exchange and digital ownership
- Encourage direct community chat and interaction

Games will rotate monthly and include classic formats like Parqués as well as new multiplayer crypto-based formats.

10. AI for Humanity: Learn & Earn

Artificial intelligence will be used to empower users — not replace them.

Through the Learn & Earn program, users complete monthly AI challenges to:

- Build and experiment with AI tools
- Create images, bots, or smart contracts
- Win C720 tokens for their contributions
- Be featured in the community leaderboard

11. Automated Recharge System

The App Utilization Wallet is the only wallet that automatically refills when emptied.

Why? To maintain:

- A continuous supply of tokens for new users
- An infinite loop of token-based learning and rewards
- Sustainability of the in-app ecosystem

Tokens from this wallet will never run out for the purpose of education and engagement.

12. Monthly AI + Crypto Challenges

Every 30 days, Crypto720 will post a new AI-integrated crypto task. When completed, users can claim new tokens.

Examples include:

- Training a model to detect crypto fraud
- Building an NFT gallery
- Designing a DAO proposal
- Testing an automated crypto assistant

13. Credits & Leadership

Founder & CEO: Jorge Malagon (George)

Chief Operating Officer (COO): Carlos White (Charlie)

Together, they lead the Crypto720 movement with a mission to combine technology, education, fun, and real-world change in one unified platform.
